Color Your Own Zebra Longwing!

Florida's state butterfly, dressed in zebra stripes.

Free from butterflybabe.org — love this one? The full Butterfly Coloring Collection is in our Etsy shop: ButterflyBabellc

Meet the Zebra Longwing!

1. **The zebra longwing is Florida's state butterfly.**
2. **Most butterflies live only a few weeks, but zebras can live for MONTHS.**
3. **Their secret? Zebras don't just sip nectar — they collect and eat pollen too, like a protein shake!**
4. **At night, zebra longwings sleep together in groups, hanging from the same branches.**

In the garden

Host plant: passion vine. Favorite nectar: lantana and porterweed. A shady corner with passion vine is a zebra magnet.
